Appliance	16,433,893	5,185,523	31.3%
Wearable	15,052,497	3,863,212	25.7%

Strategic Insight:

While Smartphones generate 56% of total revenue, **Televisions and Appliances** yield significantly higher profit margins (31%+). Focusing on the premium TV segment could further bolster bottom-line growth.

II. Manufacturing & Quality Control

Facility Efficiency Metrics

Facility Name	Total Produced	Defective Units	Defect Rate (%)
Gumi Manufacturing 1	1,241,714	7,800	0.628%
Thai Nguyen Plant	1,297,456	8,202	0.632%
Gumi Appliance Plant	1,291,277	8,100	0.627%

Current global average defect rate is maintained at **0.63%**, well within the 1% quality target.

III. Supply Chain & Logistics

Supplier Performance Analysis

Supplier	Total Procurement (\$)	Quality Score	Avg. Lead Time (Days)
Taiwan Semiconductor (TSMC)	11,334,183	98.1	12.4
Sony Semiconductor	11,186,192	97.9	12.4
Samsung Electronics	11,158,326	97.5	12.4
BOE Technology	11,492,863	95.6	12.5
Samsung Vietnam	11,399,432	95.8	9.4

Supplier Risk Management:
BOE Technology presents the highest risk with the lowest quality score (95.6) despite receiving high order volumes. Diversifying display panel sourcing or implementing stricter QC for BOE is recommended.

Logistics & Carrier Efficiency

Carrier	Total Shipping Cost (\$)	Delay Rate (%)	Performance
Maersk Line	2,161,002	10.39%	High Delay

Carrier	Total Shipping Cost (\$)	Delay Rate (%)	Performance
DHL Express	1,879,875	8.01%	Moderate
Kuehne+Nagel	2,190,359	6.41%	High Reliability
UPS Worldwide	2,417,973	7.22%	Expensive

IV. Inventory Health & Alerts

Total current stock level across all DCs: **9,297 Units**. Average coverage: **36.3 Days**.

Urgent: Stock Replenishment Required

The following flagship items are currently below their safety stock/reorder thresholds:

- **Galaxy S24 Ultra**: Critical stock in US/Poland DCs.
